DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Art Unit: 2616

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-11, 12-17 and 18-23 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-11, 23-30 and 48-52, respectively, of U.S. Patent No. 6,690,660. Although the conflicting claims are not identical, they are not patentably distinct from each other.

For example, Claim 1 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,690,660. The only difference between the two claims is the following:

"using the data estimate to detect data received on a plurality of received communications channels".

However, it would have been obvious to one of ordinary skill in the art to recognize that the limitations, so as the motivation, set forth in claim 1 of U.S. Patent No. 6,690,660 is to *use the data estimate to detect data received on a plurality of received communications channels*. Thus, claim 1 of the instant application and claim 1 of U.S. Patent No. 6,690,660 are not patentably distinct from each other.

Similarly, claims 12 and 18 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 23 and 45, respectively, of U.S. Patent No. 6,690,660.

Claims 12 and 18 are not patentably distinct from claims 23 and 45, respectively, of U.S. Patent No. 6,690,660 since the only difference between these claims is the limitation of "using the data estimate to detect data received on a plurality of received communications channels" as recited in the rejection to claim 1.
